I Robert A. Patterson respectfully request permission to submit an article comprising a flow chart and amended claims which might reflect the synchronicity that exists between my invention and said claims.

I request this amendment cited on the basis of claim revisions, that no new matter be introduced into the article undergoing said revisions, that said invention be showcased via Flow Chart Presentation, said presentation i.e. Flow Chart be alphanumerically coordinated e.g. FIG. 1 thereby linking and matching said Flow Chart with said Claims, and beginning with Mother Invention and branching off in tree form comprising my invention. Flow Chart will contain photographic recordings, rendering invention into practical applications.

Moreover: I have met with the inability to communicate with you via phone interview during the months of April/May due to your office relocation. It wasn't until I accessed your supervisor's voice mail that I discovered you might not become available until June. As this is my first attempt at drafting a legal doc. e.g. patent app. I had several questions I would have preferred your assistance with.

Thank you,

Robert A. Patterson 5/07/05
